Gerard Daniel Worldwide is a major supplier of synthetic fabrics to the filtration industry. Our products include a full line of monofilament filter fabrics using both nylon and polyester. These products are woven on the state of the art, precision looms, washed and heat set, to create a fabric that will meet your most demanding requirements.

INVENTORY

We stock a full range of products with openings between 40 and 1000 microns in both of our United States and European facilities. Our standard material widths are 66" and 72". Typical bolt lengths are 50 linear yards. Other widths and lengths are available.

NYLON/POLYESTER MONOFILAMENT SPECIFICATIONS
