

## Pretension Screens

Made to Your Custom Size Requirements

### Pretension Screens

Our quality pretension screens are made to fit virtually all original equipment manufacturers. The tension of the screen is provided by epoxy resin or carefully controlled spot welds.

Our entire range of round pretension screens are shipped with a gasket attached to speed up screen changes. Our rings are manufactured from approved FDA components.

Each of our round pretension screens use a rolled foundation ring made from high quality 304 stainless steel. The ring is seal welded to eliminate contamination inside the rolled form producing a cleaner finished product.

Uniform screen tension is built into every screen we make providing a more consistent finished product. This increases throughput yields while reducing premature screen failure.

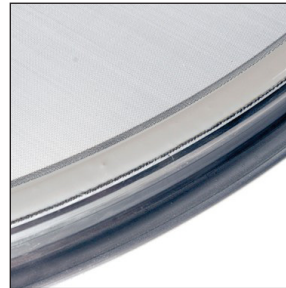

### Our Pretension Screens are available at:

18", 24", 30", 40", 48", 60" and 72"

### Square Screens

We re-screen rectangle, square and custom supplied frames by request. Self-cleaning screens using sliders or neoprene balls and screens made to fit.

### Epoxy Edge

Food Grade Epoxy edge finishing is available for all applications upon request.

### Accessories

Items such as Spacing Frames, Support Springs, Clamp Rings, Shaker Motors, Perforated Plates, Table Frames, Single and Cluster Sliders, Screen Gaskets – EPDM Food Grade, etc. are all available.

### Quoting/Estimate Requirements

Please provide the following information when requesting a quote from your sales representative:

- The ring size
- Epoxy or spot weld mounting
- Make or model of the equipment
- Mesh size, wire diameter, and alloy (along with backup screen if required)
- Center mounting hole requirement
