Separator Parts and Accessories

- Spacing, Table, and Distribution Frames
- Rubber Coated Nylon (RCN) connector sleeve
- Support Springs
- Center-Tie-Down Assembly
- Clamp Ring – Available in Bolt or Quick Release
- Shaker Motor – 1/3 to 5.0 hp
- Perforated Plate
- Flexible Connectors – Molded Corrugated Boots
Several Diameters are available. There are also several base polymers to choose from.
- Single and Cluster Sliders
- Screen Gasket – EPDM Food Grade
- Cleaning Balls, Replacement screens

Slider Tray Assembly

Recommended when screen binding occurs due to wet, suspended particles. Single and cluster sliders are available.

Ball Tray Assembly

The ball tray assembly is used when screen blinding is caused by near size particles. Mesh cleaning balls are used to help control blinding and improve screen performance.

The balls come in a variety of compounds, sizes and are available in custom colors.

Perforated Plate

A perforated plate is commonly used with the slider tray assembly and ball tray assembly. It may also be used in place of a screen for heavy scalping applications.
